

The JourneyWorks AI Transformation

From Raw Data to Actionable Intelligence

Inputs

30,000+ Communications /
Month

Social Media (X, Reddit,
Trustpilot)

Letters (OCR
Digitised)

ROADMAP

AI Engine

Auto-classify

LLM-powered classification
(regulatory, product,
severity)

Sentiment

Emotion tracking across the
journey

Root Cause

LLM-driven topic & theme
analysis

Anomaly Detection

On-demand statistical
outlier scanning

Analyst UI

Ask questions in plain English

Get evidence-backed answers in seconds

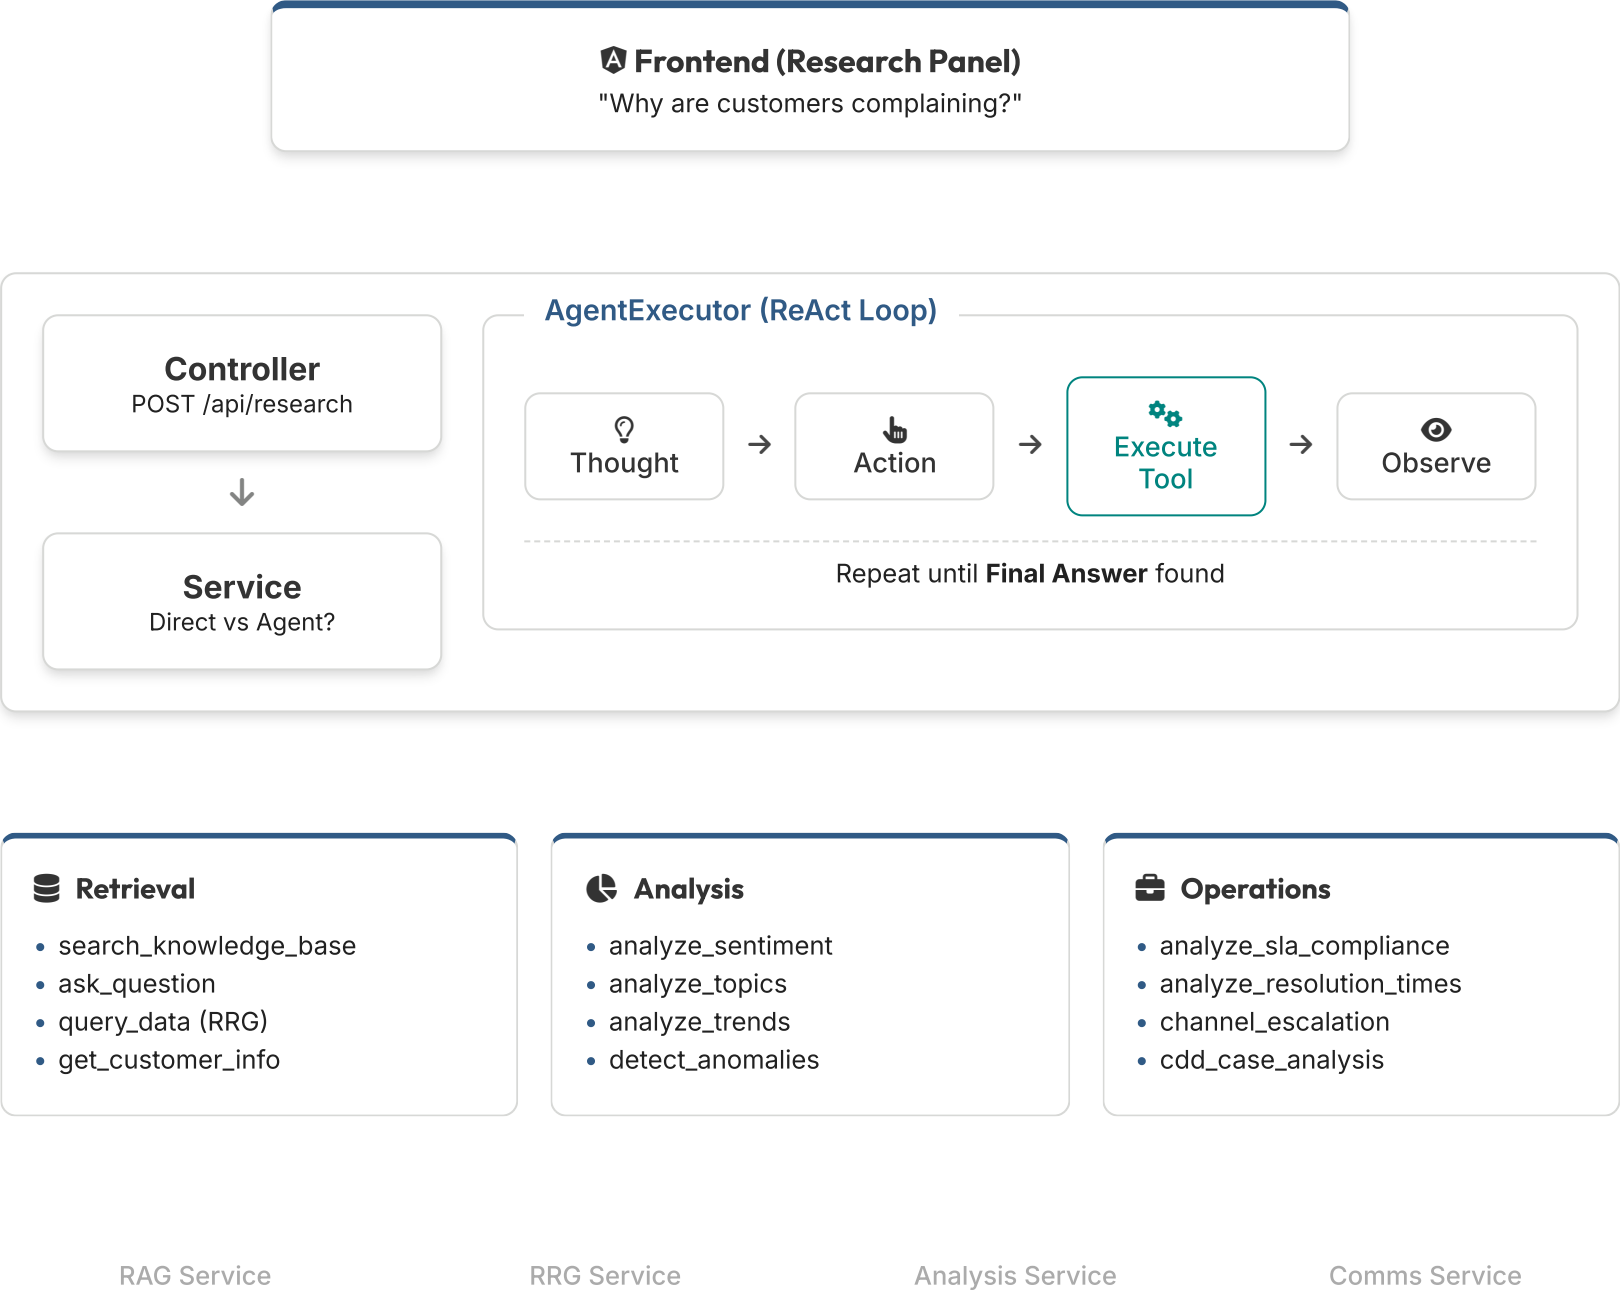

Every insight cites its sources

AI supports judgement, never replaces it

ReAct Agent Architecture

Autonomous Reasoning & Action Loop

Use Cases Enabled by AI

Solving Real-World Challenges

COMPLAINTS INTELLIGENCE

- Root cause across thousands of cases
- Theme clustering
- Trend detection
- Category breakdown

VULNERABILITY DETECTION

- Risk scoring per customer
- Sentiment analysis
- At-risk customer identification

REGULATORY COMPLIANCE

- Regulatory auto-tagging ¹
- SLA breach detection
- Audit trail for every AI interaction ¹

SOCIAL MEDIA EARLY WARNING

- Cross-reference social sentiment with complaints
- Reputation risk alerts
- Social sentiment as leading indicator for complaint trends

OPERATIONAL ANALYTICS

- SLA compliance monitoring
- Channel escalation analysis
- Resolution time statistics
- CDD remediation tracking

DEEP RESEARCH

- Multi-step investigation
- Investigate if card outage complaints correlate with customer churn
- AI reasons autonomously
